- Of vital importance to Soviet coastal defenses in the Yingchengtau (121-24, 39-01) area, the airfield at Hola motzutum (121-21, 39-00) was built in January 1946, 5,000 workers were mobilized to level the rocky areas and lay the five mathick steel plates which form the runways. To service the field a highway was built in April 1946 from Tungheiaomotrutum (121-22. 39-00) to Huanglungtsun (?121-25, 38-58). In 1947 the runways sank several times but were permanently repaired in September 1947. The airfield is not large and there are usually only 15 to 20 fighter planes parked there. Approximately 50 anti-aircraft and mountain guns are emplaced on the mountain tops northwest of the field. (See Attachment I.)
- 2. On 8 March 1948 there were six or seven large, dark gray aircraft (?bombors ?transports) and about 50 small, white aircraft (? fighters ? lisicon) on the Choushuitzu (121-34, 38-58) afrfield.
- The race course at Sanlichimotum (121-14, 38-50) is being used by the Soviet Air Force as a signal field (?air-ground radio limison ? vicual signals)
- In the spring of 1946 plans were made by the Soviet Air Force to take over 2,240 mou of civilian land properties in the Fangchistum (121-10, 38-49) area for an airfield. The blueprints for this project have been completed, but construction has not yet been begun.
